BUY!! A fantastic point-and-click adventure with intuitive puzzles, great voice-acting, a huge number of branching choices, tons of collectables, and genuine humor. I can't recommend this enough! Monkey Island would be proud.. This is a terrific game! It's very fun even though it might seem like it's just a boring word game. I couldn't stop playing for the first three and a half hours. It's a very low price for such a long and very enjoyable game. Do yourself a favor and check it out. The Developers also added a feature where you can make your own word games.. I like the concept of Super Game Jam and how these were real in the sense of visual documenting. However, only the first and third episodes were interesting the watch. I hope they do more of these but where you can purchase per episode vs the whole thing.. Good game, looks to be using same engine as hollow realization, and works fine and nicely. First time I play this game about 6 month ago, and it was good. But now it's much better!

It's an old-fashioned game with a non-stop action.

Graphics, music, sound effects - everything is nice. Good storyline. Interesting perks in RPG mode.

I like it! This game is for true ninjas :). Worst game I played 2015 and I thought this game would be great.

I do not recommend this game.. No many words, just a real nice game.

That makes you feel good while playing.

Relax and play get your head clean and forget the world outside..... why to everything.... just why? the main games are acceptable but this? just go play Bloons TD if you want a good tower defense game... My main issue... 3 boring skirmish maps that only total about 3 hours playtime, not the 10 that it advertises. Same goes for Chance of Dragons DLC. Cheap unimaginative DLC.. It's been almost one year since the last patch, and yet there are glaring Turn Zero bugs still present. What makes it so bad is these bugs (like Yalta not affecting Suez Crisis) are simple ones, not complex AI issues. And their presence makes it completely invalid to play Turn Zero in certain ways.

Shame!. I love this game. I play a lot of Hidden Object games and this is up there with my favourites (So much so I originally bought it from Big Fish Games and now I have bought it on Steam to play again whilst I wait the sequel). It says a lot I actually can't wait for the next one to know where the story goes. If you like Hidden Object games, this is up there with the MCF series, and I love the Ravenhurst ones (all of them!).
